ARL e-Quote Platform

Corridor Indexed Base Rates and Service Point Additional

Update your standard rates per transport and offer the indexing of corridors in your schedule. Add relevant additional to service points and allow the quote engine to calculate total price.

Internet Customer Self-Quote

Outsource your quote desk to customer self-service. Let customers quote online: provide them with departure choices for their requirements and – possibly - with varied prices depending on service corridors indexes.

Optionally request customer contact details prior to submitting quote. This way you can follow-up on all relevant freight quotes issued, and e-mail freight quote confirmation to requestor.

Use the freight quote engine on the arl-shipping.com site or embed the quote engine into your own web-site for branding and colours; your web-site with online quote query, *powered by arl-shipping.com*.

Pick-up & Delivery Costs

Reflect door-door pricing in quotes: base them on standard mileage rates or time-based rates. Pick-up & delivery costs will be calculated automatically based on pick-up & delivery locations and added to point-point rates.

ARL e-Quote Platform

For Transport Providers

You operate a scheduled transport service which is used by multiple customers, who need freight rates for your transport offerings.

Deep- and short sea shipping, rail & barge links, scheduled trucks, NVO and liner agents are supported.

Hosted Solution

ARL e-Quote Platform is an internet application used by multiple transport companies sharing the costs. It is hosted by professionals and available 24 hours a day, Sunday through Friday.

The application is secure, data transferred to partners is encrypted, and corporate users are authenticated with personal credentials. Requires PC with Microsoft Internet Explorer 6.0 or higher. Assumes the use of ARL e-Schedule Platform.

Main Functionalities

- Set currency and base rate
- Set index base rate to serviced corridors
- Add mileage costs and calculation method
- Establish additional, costs/calculations and validity; assign to service and service points
- Provide freight quote inquiry across multiple departures over Internet

- Use public portal or own branded web-site

Optional Feature

Door-door pick-up and delivery pricing.
