FOR IMMEDIATE RELEASE

ARL-SHIPPING.COM'S CONTAINER CRANE LOGGER APP IN GOOGLE PLAY

arl-shipping.com's crane activity logging app for Android phones and phablets is released for public try-out in Google Play to container ports, stevedores and shipping lines representatives.The Android Crane Logger push crane activities logged from the quayside to the Crane Logger cloud app, providing an online crane activities dashboard during the call to stakeholders, and automatic post-call statistics of accumulated crane activities timings and volumetrics.

HONG KONG, 11 JUNE 2015 – the tallyman's Android phone with the Crane Logger app on the quay works in synergy with arl-shipping.com's cloud Crane Logger, displaying real-time loggings and giving visibility to crane stoppages, waiting for yard handling gear and trucks, weather breaks, breakbulk or other special cargoes handling times, hatch covers and gear boxes, breaks for shift changes, meals, and more. The crane activities' loggings are sync'ed from the quay side Android phones to the cloud Crane Logger within seconds.

arl-shipping.com's, Director, René Bendt, states "the Android Crane Logger brings operational value adding IT support to any port transport professional irrespectively of local IT investments and corporate infrastructure, piggybacking on national mobile telco infrastructure, which is available throughout the world, including almost all 3rd world ports". He continues: "aside from the direct benefits of real-time crane activity loggings which cannot be tampered with, the Crane Logger's cloud app leverage the power of always-and-anywhere-internet accessibility by providing a real-time dashboard giving insight to what actually goes on under the cranes during the port stay".

For additional information on the Crane Logger, contact Evgeny Drokov or visit www.arl-shipping.com/cl.
